Profile

Dynamic Web Developer & Graphic Designer passionate about building world-class digital products that merge creativity with technology. Skilled in React, Python, and Adobe Creative Suite, with proven expertise in brand transformation, interactive websites, and AI-driven platforms. Known for delivering sleek, scalable, and impactful solutions while actively contributing to the WordPress and open-source community.

Key Strengths

- Full-Stack Web Development: React, TailwindCSS, JavaScript (ES6+), Python
- Design & UX Mastery: Adobe Creative Suite, Figma, Branding, UI/UX Prototyping
- Product Engineering: Admin Dashboards, SEO, API Integration, Responsive Design
- Innovation: AI-powered platforms, interactive storytelling, creative automation
- Collaboration: Cross-functional teamwork, community engagement, mentorship
- Problem-Solving: Debugging, optimization, and scalable architecture design
- Communication: Strong client-facing skills and technical documentation writing

Experience

Optimum Group Partnerships (OGP) — Web Developer & Graphic Designer

Nairobi, Kenya | 2024 – Present

- Spearheaded corporate rebrand, creating a high-impact digital portfolio that modernized OGP's online presence.
- Designed and developed admin dashboards enabling non-technical teams to manage content seamlessly.
- Delivered marketing & communication toolkits, blending creative design with business strategy.
- Partnered with global teams to roll out digital-first campaigns and scalable brand solutions.
- Developed scalable intranet and collaboration tools improving team productivity by 30%.

Selected Projects

- AI-Powered Onboarding Platform — Engineered an intelligent onboarding system that reduced process time by 40%.
- Corporate Portfolio Redesign (OGP) — Reimagined brand identity with modern UI, animations, and storytelling.
- Global Donation Website — Built a secure donation-enabled foundation platform with integrated admin CMS.
- Broker-Free Marketplace (In Progress) — Developing a global service & product marketplace eliminating intermediaries.
- AI-Driven Campaign Analytics — Designed a dashboard integrating machine learning insights for marketing.
- Personal Developer Portfolio — Delivered a world-class site with video backgrounds, animations, and seamless UX.

Education

Nairobites Trust — Diploma in Web & Graphic Design (2023)

Community & Leadership

- Speaker & active member — Nairobi WordPress Meetups
- Volunteer — WordCamp Nairobi 2025 (upcoming)
- Mentor — guiding junior designers & developers on modern tools and creative workflows
- Open-source Contributor — WordPress, React components, and design libraries

Achievements

- Delivered a world-class developer portfolio with hero video integration and seamless navigation.
- Recognized for bridging design artistry with technical depth in large-scale projects.
- Built cross-platform solutions used in global corporate campaigns.
- Increased brand engagement by 50% through reimagined storytelling and UX design.
- Developed automation scripts that reduced repetitive design workflows by 35%.
